REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: In claims 1 and 14, the claimed disk device having a spindle motor rotary portion with a balance weight receiving portion having a recess for a balance weight, with at least one auxiliary weight attached to a portion of the weight, the auxiliary weight having a rectangular shape and smaller than the balance weight is neither taught nor suggested by the prior art of record. Price et al, JP 11-353788 and Elsing are deficient concerning the balance weight recess and the auxiliary weight rectangular shape and being smaller than the balance weight as stated above. Concerning claim 6, the aforementioned references do not show the unbalance correcting method for a disk device with the auxiliary weight attached into the recess of the balance weight with the weight adjusted based on the amount of unbalance. Also, see Applicant's arguments on pages 7-9 of the paper filed 9/6/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George J. Letscher whose telephone number is 571-272-7591. The examiner can normally be reached on Conventional.
